**GOTHIC ARCH GREENHOUSES INC., CREATES NEW INTERNATIONAL
MARKETING DIVISION**

Gothic Arch Greenhouses Inc., based in Mobile AL – USA, has served the Horticulture Industry in the USA and abroad for over 60 years.

Today, due to the increasing interest from around the world in sustainable protected food production systems, Gothic Arch Greenhouses Inc., introduces a new international marketing division – GLOBAL GREENHOUSE SYSTEMS.

GLOBAL GREENHOUSE SYSTEMS main function is to aid and assist both the public and private sectors in the development of sustainable protected food production systems.

Working in collaboration with many of the world's largest greenhouse manufacturers, GLOBAL GREENHOUSE SYSTEMS will offer assistance in the planning, coordination, and implementation of state-of-the-art sustainable protected food production systems tailored to the specific economic, climatic and geographic regions of the world.

A wide variety of mainstream and innovative agricultural applications exists within sustainable protected food production systems.

These systems can be low, medium or high-tech systems and range in scope from the traditional Hydroponic NFT, Dutch Bucket and Trough Vegetable systems...to the ever popular Organic Hydroponic systems using eco-friendly natural methods of growth and beneficial insects for pest control... to the innovative and symbiotic Aquaponic system which blends hydroponic vegetable and fruit production with greenhouse enclosed aquaculture fish production.

In some instances, alternative renewable energy systems and biomass recycling are integrated within these systems to further assure the highest quality product and a cleaner environment ...the end result of which is a self-sustaining higher quality of life for all involved.

Today's agricultural production is challenged worldwide to keep pace with the stark reality of exploding populations, soaring energy-costs, diminishing arable lands and unstable weather patterns. This challenge has given rise to an increasing interest in sustainable protected food production systems.

To open a dialogue to see how a sustainable protected food production systems can work for you, visit our website today <http://www.GothicArchGreenhouses.com> and click on the 'International' menu selection on our homepage.

Your interest is sincerely appreciated and we look forward to the privilege of serving your needs.
